

STJ Launches ESG Advisory Service

STJ, together with collaboration partner [Two Oceans Strategy](#), is delighted to announce the launch of its new ESG Advisory service, guiding clients to best-in-class ESG investor engagement and helping them thrive in a rapidly changing & uncertain global sustainability landscape

STJ's ESG Advisory Service aims to assist corporates and asset-owners to optimise their ESG positioning in order to (1) optimise valuation; (2) provide revenue opportunities & cost resilience; and (3) ultimately drive a lower cost of capital.

With clear evidence that best-practice ESG companies outperform the market (refer to chart), and a raft of upcoming ESG-related reporting requirements (including UK TCFD and the SEC proposals), corporates are facing unprecedented scrutiny and accountability from investors and stakeholders around ESG issues and their supply chains. Furthermore, the financial, commercial, and reputational cost of "getting ESG wrong" has never been higher.

Contact STJ's ESG Team ([Paul Sidney](#), [Two Oceans Strategy](#)) for more detail.
